Welcome

Arthur Holm has its origins in the Danish furniture designer Jorgen Alex Jensen who was active in the sixties and seventies. His inspiration in design and his concept of ergonomics have been continued by his family, who is the design force behind the Arthur Holm product range. Arthur Holm is the result of combining Scandinavian design tradition with Mediterranean creativity, flexibility and emotion; a wide product range built development and innovation developed by broadcast electronic engineers and mechanical designers. The result; cutting edge technology with astonishing functionalities and aesthetics that have been awarded in several occasions.

Arthur Holm offers a range of ingenious products with designs based on carefully chosen quality materials and the latest technology. Products which endow meeting and conference rooms with silent, ergonomic, innovative and aesthetic solutions that integrate into the furniture, hang from the walls as works of art or are used as interactive points of information. Arthur Holm contributes to the creation of environments in which the best decisions are made and where attendants have use of the latest technology, integrated perfectly with the architectural and interior design of the surroundings.

Arthur Holm offers a selection of unique, elegant, versatile, flexible and ergonomic products that are now being used in the meeting and conference rooms, reception areas, auditorium and public zones of leading companies throughout the world. The numbers speak for themselves! We currently own 33 product patents, have presence in over 45 countries, with products and solutions in more than 25,000 installations.

We are proud to present the most complete product portfolio with many options and accessories and endless customization possibilities. Do not hesitate to contact us. We are at your entire disposal to help you with your specific projects.

Thank you very much for your continuous support.

Your Arthur Holm team

Impeccable Integration into furniture

One operation sensor on top of the aluminium housing

Front double sided anti-reflective 2 sides coating 2 mm. glass

Energy saving, low consumption video controller AH-AMMC: Auto Mechanical Movement Calibration Wireless connectivity for setup and control: AHlink No cover plate required 20 mm. max thickness

DB2 is a motorised retractable monitor range that creates minimum impact on the furniture's design. It is easy to integrate, intuitive to use (one simple operation sensor located on the top of the monitor) and almost invisible (no cover plate, neatly streamlined into the furniture) when not in operation. DB2 provides a harmonious silent drive with variable speeds. With a maximum thickness of 20 mm., this monitor range is elegant, beautiful from all angles and can be veneered for a seamless integration in the furniture, creating a long lasting user's experience and delivering an exceptional image's quality. The monitors are equipped with AH-AMMC: an auto mechanical movement calibration system and the use of the Arthur Holm's ERT will enable the address configuration of all the monitors installed in a table by simply pressing a button. The AHlink app allows a wireless access to the test and adjustment functions without removing the unit from the table.

MODEL	DESCRIPTION MSR	P PRICE \$
AH 17DB2	HDCP compliant vertically retractable aluminium 17.3" Full HD monitor with 20 degrees of adjustable inclination. Solid aluminium monitor housing with 20 mm. of thickness featuring 2 mm. double sided anti reflective black edged glass. Allows its installation in a furniture opening of a maximum width of 24 mm. and the monitor housing is flush with the desk once in recessed position. One capacitive sensor is located on top of the aluminum frame and a second touch sensor on the screen's glass. DVI-I and DVI-D inputs, RS-422 I/O, ISD (Interactive Setup Display), USB port for firmware upgrades, AH-AMMC (Automechanical movement callibration. AHlink.	3886
AH22DB2	HDCP compliant vertically retractable aluminium 21.5" Full HD monitor with 20 degrees of adjustable inclination. Solid aluminium monitor housing with 20 mm. of thickness featuring 2 mm. double sided anti reflective black edged glass. Allows its installation in a furniture opening of a maximum width of 24 mm. and the monitor housing is flush with the desk once in recessed position. One capacitive sensor is located on top of the aluminum frame and a second touch sensor on the screen's glass. DVI-I and DVI-D inputs, RS-422 I/O, ISD (Interactive Setup Display), USB port for firmware upgrades, AH-AMMC (Automechanical movement callibration). AHlink.	4080
AH24DB2	HDCP compliant vertically retractable aluminium 23.8" 4 K monitor with 20 degrees of adjustable inclination. Solid aluminium monitor housing with 20 mm. of thickness featuring 2 mm. double sided anti reflective black edged glass. Allows its installation in a furniture opening of a maximum width of 24 mm. and the monitor housing is flush with the desk once in recessed position. One capacitive sensor is located on top of the aluminum frame and a second touch sensor on the screen's glass. 1/VGA, 2/DisplayPort, 2/HDMI inputs, RS-422 I/O, ISD (Interactive Setup Display), USB port for firmware upgrades, AH-AMMC (Auto-mechanical movement callibration). AHlink.	5486

DB2Share

Front double sided anti-reflective 2 sides coating 2 mm. glass

Energy saving, low consumption video controller AH-AMMC: Auto Mechanical Movement Calibration Wireless connectivity for setup and control: AHlink No cover plate required 20 mm. max thickness

DB2 Share is a motorised retractable communication solution that creates minimum impact on the furniture's design. It is easy to integrate, intuitive to use (one simple operation sensor located on the top of the monitor) and almost invisible (no cover plate, neatly streamlined into the furniture) when not in operation. This solution provides full control to view and share documents and videos with a motorised retractable HDMI cable that raises as an extension of the slick design of the monitor.

By touching directly on the monitor, users can select the HDMI input and share it. Monitors are equipped with 2 HDMI-HDCP compliant inputs and 1 output, allowing the daisy chain of a maximum of 20 devices.

Patented single engine mechanism for up/down and tilt movements Automatic 20° tilt angle Milled aluminium housing with a contemporary design Stainless steel customisable cover plate Front double sided anti-reflecting 2 sides coating 3 mm. black edged glass Wireless connectivity for setup and control: AHlink AH-AMMC Auto Mechanical Movement

DynamicX2 DynamicX2 UnderCover

DynamicX2 is a motorised retractable product range that provides silent, reliable and harmonic movements using a patented solution with just a single engine. DynamicX2 is equiped with a variable speed system to raise, lower and tilt 20° to ensure the best ergonomics, viewing angle and visibility. DynamicX2 have slightly curved edges for a contemporary and longstanding look and the screen is protected with an anti-reflective 2-side coating 3 mm. black edged glass.

The stainless steel cover plate can be customised with different connectors, retractable cable and fixed or monitorised microphones as well as other features.

MODEL	DESCRIPTION MSRI	P PRICE \$

AHDL	DynamicLoop allows the daisy chain of tan HDMI signal. This board is internally integrated so no additional power supplies are needed and it provides HDMI I/O. The loop doesn't need to be closed. A Maximum of 20 units can be daisy chained at Full HD resolution with maximum 40 meters of cables in total (no cable in the chain should exceed 5 meters, it is always recommended to use 4K cables; and always use the shortest possible).	503
AHDSS	DynamicShare allows the daisy chain of HDMI signals, the input selection, the share and the control (AHnet). This board is integrated in the monitor so neither additional power supplies nor additional devices are needed. The loop needs to be closed (ring loop). A Maximum of 20 units can be daisy chained at Full HD resolution with maximum 40 meters of cables in total (no cable in the chain should exceed 2 meters. It is always recommended to use 4 K cables; and always use the shortest possible. An extender kit is needed when the distance between the first and the last monitor is longer than 5 meters.	686
AHISBD2	HDMI retractable cable integrated into the monitor's cover plate allowing users to share one input to the rest of devices connected by DynamicShare.	915
АННС	Fixed HDMI connector integrated into the monitor's cover plate allowing users to share this input to the rest of devices connected by DynamicShare. HD-SDI camera integrated in a frame above the LCD display.	160
AHDSPB	Priority button integrated on the monitor's cover plate that can lock other user's share function. Only one priority button can be assembled on the system.	52
АНВТЕК	Kit that comprises one transmitter and one receiver to extend the HDMI connection above 5 meters from the first to the last unit in the loop.	515

Aluminium retractable monitor with an independent microphone lift Stainless steel cover plate Wireless connectivity for setup and control: AHlink Monitor: Patented single engine mechanism for up/down and tilt movements Automatic 20 ° tilt angle Milled aluminium housing with a contemporary design Front double sided anti-reflecting 2 sides coating 3 mm black edged glass Microphone's lift system: Microphone lift compatible with 3 Pin XLR 500 mm gooseneck microphones Patented 360 ° LED lighting ring to indicate microphone status

PA and Conference working modes Available customisations with conference brands

Dynamic X2Talk

DynamicX2Talk is a motorised retractable monitor that includes an independent lift for gooseneck microphones. The system provides silent, reliable and harmonic movements using a patented solution with one only engine. The variable speed system raises, lowers and tilts the monitor 20° to ensure the best ergonomics, viewing angle and visibility. The integrated independent lift system for microphones provides a rounded microphone coverlid and it not only makes the microphone disappear within the desk surface, but it also provides a pleasant light to indicate its status. Thanks to its protective and patented lighting ring, the microphones can be safely stored and protected making meeting and conference spaces more flexible and versatile.

This system has two different working modes: PA and Conference. In PA mode, a push button activates and de-activates the microphone and the LED ring will show the status by changing colour from red to green. The system will automatically silence the microphone when retracting. In Conference model, the microphone will be always active.

- Please, note that the microphone is not included.
- Please, note that we offer customisations with audio conference brands.

MODEL	DESCRIPTION MSF	P PRICE \$
AH 15DX2HDGATalk	HDCP compliant vertically retractable aluminium 15.6" Full HD monitor with 20 degrees of automatic inclination with an independent lift for "gooseneck" microphones. Single engine patented mechanism. Solid aluminium monitor in natural anodisation finish featuring 3 mm. double sided anti reflective black edged glass. Up-table cover plate made of brushed stainless steel integrating a rounded microphone coverlid. The system provides a patented 360° LED lighting to indicate microphone status. AHlink.	4949
AH 17 DX 2 HDGATalk	HDCP compliant vertically retractable aluminium 17.3" Full HD monitor with 20 degrees of automatic inclination with an independent lift for "gooseneck" microphones. Single engine patented mechanism. Solid aluminium monitor in natural anodisation finish featuring 3 mm. double sided anti reflective black edged glass. Monitor:

Patented single engine mechanism for up/down and tilt movements

Automatic 20° tilt angle

Milled aluminium housing with a contemporary design

Front double sided anti-reflecting 2 sides coating 3 mm. black edged glass

DynamicX2KM

DynamicX2 monitor combined with an automated keyboard and mouse, creating a motorised automation system that lifts the keyboard and mouse at the same time the monitor is being raised. This combination offers the best possible quality Full HD screen with an elegant keyboard and mouse storage that converts into a work station by the touch of a button. It is intuitive and extremely easy to install; a solution that offers improved table space and a neater environment.

• Keyboard and mouse are not included.

Low profile monitor enclosure Entire built in anodised aluminium: monitor housing and cover plate Opens, folds and rotates 180° 2 working positions: vertical and horizontal Automatic image flip Patented synchronised tray lift movement Keyboard and mouse storage space Flotating security sensor AH-AMMC: Auto Mechanical Movement Calibration Wireless connectivity for setup and control: AHlink

Dynamic3

Dynamic3 is a motorised product range that provides different working positions while keeping a low profile inside the working desk and a perfect integration in the furniture. The aluminium monitor housing rises and leans, has an additional 180° rotation movement, and retracts inside the work surface in 2 different positions: with the monitor oriented up or down. The movement can be stopped at 90° and then rotate 180° in order to share the display with the person located at the opposite side of the desk. The screen's lifting system automatically activates the elevation of a tray where a keyboard and mouse can be placed.

MODEL	DESCRIPTION MSRI	P PRICE \$
AH 15D3RHDGA	HDCP compliant 15.6" Full HD foldable monitor with horizontal and vertical working positions. Can work in a horizontal position levelled with the desk surface or in a vertical position with 20° of variable inclination. The monitor can rotate 180° and can be folded with the screen facing down. Low profile monitor enclosure Entire built in anodised aluminium: monitor housing and cover plate Opens, folds and rotates 180° 2 working positions: vertical and horizontal Automatic image flip Patented synchronised tray lift movement Keyboard and mouse storage space Flotating security sensor AH-AMMC: Auto Mechanical Movement Calibration Microphone lift compatible with 3 pin XLR 500 mm. "gooseneck" microphones Patented 360 ° LED ring to indicate microphone status PA and Conference working modes Allows customisation with conference brands Wireless connectivity for setup and control: AHlink

Dynamic3Talk

Dynamic3Talk is a motorised product range that provides different working positions and includes an independent lift for "gooseneck" microphones. The aluminium monitor housing rises and leans, has an additional 180° rotation movement, and retracts inside the work surface in 2 different positions: with the monitor oriented up or down.

The screen's lifting system automatically activates the elevation of a tray where a keyboard and mouse can be placed. The integrated independent lift system for microphones provides a rounded microphone coverlid and it not only makes the microphone disappear within the desk surface, but it also provides a pleasant light to indicate its status. Thanks to its protective and patented lighting ring, the microphones can be safely stored and protected making meeting and conference spaces more flexible and versatile.

MODEL	DESCRIPTION MSR	P PRICE \$
AH 17 D3 RHDGATalk	HDCP compliant 17.3" Full HD foldable monitor with horizontal and vertical working positions including an independent lift for "gooseneck" type microphones. Can work in a horizontal position levelled with the desk surface or in a vertical position with 20° of variable inclination. The monitor can rotate 180° and can be folded with the screen facing down. Both the monitor housing and cover plate are made of anodised aluminium. The monitoris protected by a 3 mm. double-sided anti-reflective black edged glass. DVI-I and DVI-D inputs. Interactive Setup Display allowing the control, setup and diagnose of the monitors. Monitors provide RS-422 I/O allowing the remote control of movements, speeds, safety settings, brightness, contrast and backlight. The monitors are equipped with AH-AMMC: an auto mechanical movement calibration system. AHlink.	7258

Dynamic3Reverse

Dynamic3Reverse is a unique electrically foldable 18,5" monitor with horizontal and vertical working positions. Its tilt angle can be adjusted to any point, from flush with the desk up to 90°, and it rotates to be folded. The rotation axis is located in the area that is closer to the user and the user can select the desired tilt angle, from flush on the table to a vertical position, ensuring a total view on the room. The monitor can then rotate 180° to be closed with the screen facing down and therefore, totally protected.

DynamicSignatureDisplay

DynamicSignatureDisplay is a retractable digital labelling monitor for auditoriums, meeting and conference rooms, institutions and public communication spaces. The product consists of a vertically motorised retractable double side stretched screen and a Linux based software, which allows a simple display of a picture and a name (or any digital content) in full colour. Two screens are placed back to back in a compact, anodised aluminium frame, displaying different information on each one. The side facing the audience will display the picture and name of the conference participant, and the information in the other side allows the attendee to identify the seat. The system is ideal for name tagging applications over a single Ethernet connection per monitor.

DynamicSignatureDisplay is equipped with a Linux based player, with TCP/IP interface for control, configuration and content upload and management.

The system needs a dedicated network to operate. It is necessary to add a server and the management software is preinstalled and configured from factory.

MODEL	DESCRIPTION MSRP PRI

All-in-one solution for hybrid and in-person meetings Human-centered motorised retractable solution Adaptable shape to a variable number of attendees Face-to-face communication Excellent audio and video quality 4 video cameras, speakers, microphones, USB charging, HDMI and wireless connectivity Internal PC to upload any platform: Teams,

Dynamic4

The Dynamic4 is a unique Windows based media meeting point that creates an unmatchable meeting platform with extended flexibility. It comprises a motorised mechanism of 4 screens with 4 integrated cameras, 2 speakers, 2 array microphones, a CPU, 4 USB power and 2 tabletop HDMI inputs. It is a center of table solution that helps to optimize the space and to keep the eye contact during the meetings. By the push of a button, 4 monitors will raise from the table surface.

These monitors can be raised and retracted, they can move to different shapes and rotate to find the perfect position according to the different seats around the table. These monitors can be arranged according to the number of meeting attendees and their position, from a flat diamond shape to a square shape. A software driver allows the 4 cameras to be shown simultaneously, and 2 array microphones together with the speakers ensure a perfect speech intelligibility. The internal CPU comes with Windows 10 and allows to connect to a server or to apps for remote meetings such as Zoom, Teams, Meet, Skype, and more.

MODEL	DESCRIPTION MSRI	P PRICE \$
AH 17D4HDGA	Windows based media meeting point comprising HDCP compliant 4 X 17,3" FULL HD monitor solution. From a flat diamond shape to a squer shape, the monitors can be arranged to suit the number and position of the attendees. Internal CPU.	24572

Ergonomic Motorised adjustable height Aluminium monitor with a stainless steel arm Manually adjustable viewing angle 140° manually rotatable Wireless connectivity for setup and control: AHlink.

DynamicReceptionMonitor

Motorised adjustable reception monitor for a perfect fit. Quick motorised adjustment to match each individual needs when working to create a correct and preferable work environment at the front desk.

The professional Arthur Holm DynamicReceptionMonitor incorporates the latest professional technologies to ensure a perfect workplace. It offers a non-obstructive design in which all technical interfaces and cables are internal, so the front desk is free of cables and obstructive components, creating a cleaner work environment.

The DynamicReceptionMonitor has been designed to be integrated in tables or desks. The base of the monitor is installed on the surface and its connectivity is placed below the table, making the installation clean and minimalistic. The elegant monitor housing is made of milled aluminium and stainless steel and it includes an antiglare protection glass with black marking. The stainless steel rotary arm of the monitor offers a motorised adjustable height for a perfect fit.

Milled aluminium monitor with cast iron base Front anti-reflection glass Manually foldable Totally adjustable position from 0° to 70° Cable management system USB passthrough Maintenance free Energy saving design

AH1 is an aluminium manually foldable monitor for table top with a natural anodised finish and a black cast iron base. This multifunctional iron base serves for several purposes: the unobstructed base holds firmly the aluminium monitor housing in place and provides a stepless adjustment of the viewing area. Furthermore, the base hides the cable connection and guides the cables unseen away from the monitor when using the cable exit in the centre of the base or, if needed, the rear cable outlet.

The screen position can be easily adjusted from flat on the table to 70°.

The monitor includes a USB passthrough from the side.

AH1 is the ideal solution for auditoriums, telepresence, training rooms, meeting and conference rooms and information counters.

ΔΗΊ

AH2 manually foldable monitors are the perfect solution to create flexible and versatile tables needing to optimise the space.

The monitor is fixed to the table surface through its milled aluminium base, allowing the user to adjust the viewing area of the monitor, holding the monitor in a firm working position. All connectors are placed under the table and cables are passed unseen through the base to the monitor, leaving the monitor minimalistic design unobstructed.

They are aluminium monitors that can be easily folded down to leave a direct line of sight to the other participants or activities taking place in the room. Furthermore, the low profile space needed for their installation allows users to have a large cable-free surface to work using both the screen and other materials over the desk.

Rise

Designed to be wall mounted

Rise monitors are ideal to offer relevant meetings information when placed outside a conference or meeting room or in any place where they will undoubtedly catch the eye of the public. They can show details about the session taking place inside, being extremely helpful and engaging for attendees to know schedules, programmes or other general information of interest.

The monitors are robust and resistant, they are available in different sizes and finishes to integrate perfectly with the interior design and they are all set for the busy areas where they are installed. They serve users with advanced technology ready to play, elegant and easy to install, adding a distinctive smart touch in a particular building or meeting and working up an awesome experience to remember.

Wireless connectivity for setup and control: AHlink.

Designed to be dropped into the table top

DynamicTalk

DynamicTalk is an elegant retractable system for gooseneck microphones with exclusive features. It not only makes the microphone disappear within the desk surface but it also provides a pleasant light to indicate its status clearly indicating to the rest of the participants whose microphone is open. Thanks to its protective and patented lighting ring, the microphones can be safely stored and protected making meeting and conference spaces more flexible and versatile.

DynamicTalk provides two different working modes: PA and Conference. When in PA mode, a push button placed on the stainless steel cover plate allows to activate or de-activate the microphone and the LED ring will indicate the status by changing colour from red to green or vice versa. This microphone lifting system automatically silences the microphone when retracting whereas in conference mode the microphone remains active and can be controlled via GPI and GPO.

The cover plate is made of brushed stainless steel with optional integration of different interfaces and with the possibility to have different finishes. DynamicTalk is available in 3 standard sizes: 400 mm, 500 mm, 600 mm (for short, medium and large microphones with XLR, 3 pin connector). Customised versions are also available for several types and sizes of conference microphones and conference brands.

MODEL	DESCRIPTION MSRP	PRICE \$
AHDTLS	Professional retractable system for 3 pin XLR gooseneck microphones with a maximum length of 400 mm (microphone not included). The cover plate is made of brushed stainless steel and provides a rounded microphone coverlid and 3 operation buttons to open/close, mute/unmute and a free GPO button. The lift system includes a translucent plastic rounded ring to centre the microphone during its rise and retract movement from a position hidden below the cover to a top position projected through the cover, avoiding the microphone from touching the cover plate, damaging or blocking when retracting. Compatible with AHlink: a wireless app that allows the system to be adjusted to the exact microphone length, facilitates the unit's serial number, allows the activation and deactivation of the RS-422 termination and allows to change the working mode from PA to Conference. AHlink.	1486
AHDTLM	Professional retractable system for 3 pin XLR gooseneck microphones with a maximum length of 500 mm (microphone not included). DynamicTalk UnderCover

DynamicTalk UnderCover is an intelligent solution comprising a lifting system for a gooseneck style microphone. It combines DynamicTalk, with UnderCover, an award winning automated cover. The patented smooth mechanism of the cover allows the DynamicTalk microphone to be neatly concealed beneath the furniture by simply pressing a button. When the microphone is needed the UnderCover plate slides down and disappears into the table. Then the microphone is lifted gently and effortlessly up to a working position and the user can adjust it to get a comfortable angle to speak.

A LED ring at the base of the microphone indicates the speaker's status changing from green to red or vice versa. DynamicTalk UnderCover is available in 3 standard sizes: for gooseneck microphones with a maximum length of 400 mm, 500 mm and 600 mm and can also be customised for different types and sizes of conference microphones and conference brands.

MODEL	DESCRIPTION MSRP	PRICE \$

Low profile enclosure Adapts to 400 mm microphones LED (red/green) to indicate microphone's status Serial control & Remote Diagnosis Maintenance free

DynamicTalkH

DynamicTalkH is a horizontal lift for 400 mm gooseneck microphones. With a low profile enclosure, the system has been especially developed to optimise the space below the table in open table designs. Silent, remotely controllable and elegant, DynamicTalkH is very easy to install to install. Veneering is also available to match surface finish of the table. This system allows the microphone to be bended while returning automatically to its original horizontal position. DynamicTalkH not only conceals cleverly the microphone within the desk, but it also provides an interior light that goes from red to green to indicate its status. Microphones are stored safely, improving the flexibility of meeting and conference spaces, as tables can be used for different purposes. DynamicTalkH can be remotely controlled and diagnosed through the AHnet protocol (RS-422).

Motorised wall mount for videoconference cameras Compatible with the most popular videoconference cameras Cover for veneering RS-422 and Infrared controllable Easy to install

DynamicVision

DynamicVision is an efficient motorised solution to hide videoconference cameras and improving the room design. The DynamicVision is designed to be adapted to the room décor. Its fabric mounting system allows an easy mount of the fabric of your choice onsite. The DynamicVision can also be veneered with a maximum veneer load of 2.5kg / 5.5lb. The camera enclosure is controllable through RS-422 (AHnet), GPI and Infrared.

DynamicVision provides the ideal solution to conceal videoconference cameras while improving the interior design of the conference room with its easily adaptable front enclosure that can be covered with various materials. The preinstallation frame is the perfect solution for coordination between system integrators and architects or constructors. The camera enclosure is activated via RS-422, infrared or GPI interface when needed. It neatly stores the camera away when not required, both protecting the camera and securing the work environment. The front enclosure moves vertically to expose the camera while moving the camera moves forward simultaneously to free the camera lines from the enclosure. DynamicVision is the perfect solution for system integrators, architects, interior designers and space planners.

ConnectionBox

Arthur Holm Connect, The Arthur Holm cable cubby solutions have been designed to blend discreetly with the furniture and to give the user a professional AV solution with a long-life span. The Arthur Holm cable cubby solution is available as a standard product with mix and match connectivity, power and control or as a veneer version that is prepared for the veneering to match the furniture 100% and a seamless integration. The veneer versions have been designed and prepared for veneer, making the mounting of the veneer uncomplicated and easily done onsite without special requirements.

The Arthur Holm cable cubby system have been designed for system integrators, table manufactures and designers who want to go one step further for the perfection of integration with an actual and lifelong design that fulfils all the technical aspects for modern and future connectivity and controls.

- Mix and match connectivity.
- Straight forward underneath or up-desk installation.
- Factory colour option.

The Arthur Holm Connect program ranges from manual to motorised cable cubbies in standard version ready to install or as a veneer version, which can be veneered with the material of your choice.

Manual solution for AV connectivity and power Designed to be discreet Ready to veneer Custom versions and finishes

ConnectionBox

AHCH Arthur Holm Connect Hatch

Arthur Holm's manual connection box is manual opening connectivity solution that allows users to connect their devices in a discrete and streamlined way.

The Arthur Holm basic cable cubby with a manual hatch that manually slides down behind the connectors to gain free access to connectors. This model is available in three sizes and all connectivity is configurable. AHCH is available in a version for veneering AHCHV.

Please contact us.

AHC2H Arthur Holm Connect 2 Hatch

The Arthur Holm 2-hatch cable cubby with a manual 2-hatch system allows in an elegant way to connect smaller and larger power supplies and leaving a minimum gap for cables and power supply. Pushing down the narrow hatch the wide hatch moves up in a synchronised movement providing free access to connectors, after connecting, the two hatches close softly around the cables without marking the cables. The inclined connectors make access to connectors easy and guide any liquid away from connectors in case of a spill and make the AHC2 housing compact under the table. This model is available in three sizes and all connectivity is configurable. AHC2 is available in a version for veneering AHC2V.

Please contact us.

AHC2HV Arthur Holm Connect 2 Hatch Veneer

The Arthur Holm 2-hatch cable cubby with a manual 2-hatch system ready to be veneered for matching table surfaces allows in an elegant way to connect smaller and larger power supplies and leaving a minimum gap for cables and power supply. Pushing down the narrow hatch the wide hatch moves up in a synchronised movement providing free access to connectors, after connecting, the two hatches close softly around the cables without marking the cables. The inclined connectors make access to connectors easy and guide any liquid away from connectors in case of a spill and make the AHC2 housing compact under the table. This model is available in three sizes and all connectivity is configurable. AHC2 is available in the version for veneering AHC2V.

IP to RS422/RS485 Interface ERT-60: 2 x AHnet Port for up to 60 units ERT-30: 1 x AHnet Port for up to 30 units OTAS (One Touch Addressing System) RDM system (Remote Diagnostic and Maintenance) Remote/local control and management Wireless connectivity for setup and control. AHlink.

ERT-30 ERT-60

The ERT interfaces provide an easy and convenient setup to control and diagnose motorised monitors, microphone lifts and other automated solutions from Arthur Holm. The ERT interfaces help to reduce the installation time and costs. They facilitate a quicker installation and eliminate the need of third party relay boxes and extra power outlets. Furthermore, the ERT interfaces make the onsite factory support uncomplicated as long as there is an Internet connection available.

The AHlink app gives you wireless access to the ERT setup menu, basic control, serial number and factory settings, making the installation and service of the ERT and the units connected to the ERT easy and straight forward, without having physically having to touch the ERT The AHlink app is available for Android and iOS.

MODEL	DESCRIPTION MSRP	PRICE \$
ERT-30	IP to RS-422 interface to control, configure and diagnose ARTHUR HOLM motorised products. 1 AHnet port (RS422/ RS485) to control up to 30 units. Ethernet RJ45. OTAS (One Touch Addressing System). Remote/local control and management. RDM system (Remote Diagnostic and Maintenance). Wireless control through AHlink app.	858
ERT-60	IP to RS-422 interface to control, configure and diagnose ARTHUR HOLM motorised products. 2 AHnet ports (RS422/RS485) to control up to 60 units. Ethernet RJ45. OTAS (One Touch Addressing System). Remote/local control and management. RDM system (Remote Diagnostic and Maintenance). Wireless control through AHlink app.	1600

Plug and play solution Software free High security No video compression (no latency) 3/ HDMI Inputs, 1/HDMI Output Dedicated ports for Loop In and Loop Out HDCP compliant Ethernet external control Digital audio Output (AHDSSA) Easy cabling and installation Allows the daisy chain of up to 20 devices (Full HD)

DynamicShare

DynamicShare is a solution that allows each participant to share video material from each monitor connecting a HDMI cable to their devices and distribute a video signal through a HDMI loop.

DynamicShare is a smart solution that allows meeting room participants to share different video sources among each other with an optimal video quality (zero frame latency) and it doesn't require a specific training, technical knowledge or assistance.

It is a software free share system that provides quick and seamless connectivity with a high level of security. The meeting or conference table can stand alone, without the inconvenience of either messy cabling or having to integrate external devices.

DynamicShare is a solution to optimise the cabling and the installation inside a conference or meeting table, allowing the signal to be distributed and shared through an HDMI daisy chain connection topology. It is available in 2 versions: DynamicShare embedded in the monitor for signal distribution, selection and control or as a stand-alone device for third party monitors and video display solutions.

MODEL	DESCRIPTION MSRP	PRICE \$
AHDSS	DynamicShare integrated into Arthur Holm's motorised monitors allowing the daisy chain of the HDMI signal, the share, the input selection and the control in a closed loop of 20 units maximum at Full HD resolution. It includes the buttons on the monitor's cover plate.	686
AHISBD2	Retractable 600 mm HDMI cable integrated into D2 family cover plate.	915
AHISBD3	Retractable 600 mm HDMI cable integrated into D3 family cover plate.	1086
АННС	HDMI connector integrated in the cover plate.	160
AHDSPB	Priority button integrated in the cover plate.	52
АНВТЕК	Kit of transmitter and receiver to extend the HDMI connection above 5 meters.	515
