

Projector ceiling mounts

Vogel's offers a complete range of projector ceiling mounts. These projector mounts are especially designed for the latest generation projectors weighing up to 30 kg. The range includes basic projector ceiling mounts and height adjustable kits with telescopic poles.

Universal projector interface

All mounts come with a universal projector interface. This projector interface is equipped with fine-tune adjustability for precise alignment to the projection surface. Once aligned, the projector stays in position. Turning the unique friction ring will eliminate all play from the interface connections, making the mount a solid and very stable solution.

Height adjustable projector ceiling mount kits

The height adjustable projector ceiling mount kits can be used when the height of the ceiling is not known or when flexibility is required. These mounts come in three lengths offering variable height adjustment from 400 to 1350 mm. This range of projector ceiling mounts is suitable for mounting to flat and inclined ceilings up to 90°. The CIS® Cable Inlay System runs the full length of the pole and even allows for cable routing after installation. This inlay system offers sufficient space for all cables and enables you to hide these in a matter of seconds.
