

SPEAK2 75

The best professional speakerphone for hybrid working*

Technology for life's new rhythm

OUTSTANDING AUDIO QUALITY

Forget everything you think you know about portable speakerphones. We're tearing up the rule book with super-wideband audio¹, and an advanced full range 65mm speaker. This cutting-edge tech puts you front and center, unscrambling the widest range of frequencies in your voice's natural range. **It's a dramatically more powerful audio experience.**

FULL DUPLEX AUDIO

Some speakerphones don't allow both sides to speak and be heard at the same time, but we think conversations are better when they flow naturally. Speak2 75 is engineered with advanced full duplex audio, with a supercharged chipset that goes way beyond standard speakerphone performance. **So your conversations can flow freely in both directions, just like they would in person.**

MICROPHONE TECHNOLOGY

With four state-of-the-art beamforming microphones, and the very latest digital signal processing algorithms, Speak2 75 effortlessly harnesses every change in voice tone, so every nuance is picked up (because it's not what you say, it's how you say it). Innovative noise reduction technology keeps background distractions at bay. **The result is an outstanding audio performance that's truly unmatched.**

MICROPHONE QUALITY INDICATOR

See at a glance how well you're being heard at all times, wherever you are in the room, with the only speakerphone to feature a custom-designed Microphone Quality Indicator.² This intuitive 360-degree light ring shows you clearly when you're coming across loud and clear, and when you need to huddle in a little closer. **It's like having a personal voice coach in every meeting.**

VOICE LEVEL NORMALIZATION

We know how vital it is that everyone can be heard equally, so we engineered Speak2 75 with our latest cutting-edge Voice Level Normalization technology. So everyone can be heard whether they speak with quiet confidence or enthusiastic energy. **And everyone can be themselves and speak in the way that's most natural for them.**

CERTIFICATIONS

Speak2 75 is certified for all leading virtual meeting platforms, and optimizes the whole experience, for professional call quality every time. So whether you prefer to jump on Microsoft Teams, Google Meet or Zoom, you can rely on seamless plug-and-play connectivity and reliably brilliant meetings right from the get go. **So you can get together from anywhere.**

PREMIUM PORTABLE DESIGN

The iconic, much-loved 'puck' shape of the original Speak Series gets a serious makeover with Speak2 75. It's modern and minimal, with brushed aluminum detailing and premium custom designed speaker fabric, engineered to deliver the most optimal audio experience. And it's small and durable enough to throw into your bag, too. **Looks great. Performs even better.**

DURABILITY

We've made sure Speak2 75 is built to handle anything a busy hybrid working day throws at it – from messy kitchens to deep work bags – with IP64-rated** protection from dust and water. **So you can use it anywhere, without worrying.**

EASE OF USE & BATTERY LIFE

Just plug-and-play and you're off faster than you can say "you're on mute". Go wireless with up to 32 hours of battery, and make setup even more of a snap with Microsoft Swift Pair and Google Fast Pair. **Your Speak2 75 is ready for anything.**

FUTURE-PROOF

Speak2 75 is the first speakerphone in its category to have both USB C and USB A connectors on the same cable, so you won't need to tear the office apart looking for an adapter, and it'll work now, and when you get a new computer. And since we're givers, we'll also keep you ahead of the game with regular firmware updates, via Jabra Direct and Xpress software, and you can customize your settings with the Sound+ app. **Just think of it as your flexible friend.**

SUSTAINABILITY

To help consider our planet, we consider sustainability carefully at every stage of product development. The casing of Speak2 75 is made with over 33% sustainable materials³, and has a number of built-in parts that can be repaired or replaced. **Better sustainability = longer speaker life = great calls for you and your team for years to come.**

MS TEAMS & UC VARIANTS

*See Jabra.com/commercial/claims

**Avoid exposing the USB cable or adapter plug to moisture or liquids and never charge or power up if the USB cable or adapter plug is wet or moist

¹Super-wideband audio experience requires UC client support, and device support

²Initial activation is required via the Jabra Sound+ or Jabra Direct apps

³Sustainable materials include post-consumer recycled, post-industrial recycled or bio-based materials

HOW TO USE

①		Power on/off
②		Smart button
③		Microsoft Teams button (MS variant)
④		Answer call
⑤		Bluetooth pairing
⑥		Volume down
⑦		Mute microphone
⑧		Volume up
⑨		Battery status
⑩		End/reject call
⑪		Microphone Quality Indicator & Status LED ring

HOW TO CONNECT

Hold the Bluetooth button for 3 seconds and follow the voice-guided instructions to pair to your smartphone or tablet. Or connect the USB cable to any available USB C or A port on your computer. The status LED ring will light up white to indicate the speakerphone is connected and powered on.

Plug-and-play

USB C and USB A connectors included
